

Reseller Program

Tired of selling a mediocre cloud product?

Resell the industry's best-performing cloud, backed by the most helpful humans in hosting.

3 Reasons to Start Reselling Liquid Web Hosting Right Now.

Get started with no overhead – Get free access to WHMCS licenses or our home-brewed WHMCS plugin for qualified resellers. You bring the marketing and clients, we'll do the rest.

Sell a premium product at affordable rates – Get simple, tiered discounts at every revenue level, making it easy to resell your choice of VPS, dedicated hosting or even our private cloud product (<--nobody else offers this!).

Align your brand with the friendliest humans in hosting – As a reseller, you rely on your partner to provide not only a quality product, but dependable service. We take pride in going the extra mile for you and your customers 24/7/365.

WHMCS: One Interface, Unlimited Control

WHMCS makes you the master of your reselling destiny:

- Oversee every aspect of your hosting business from a single interface
- Create your own fully customizable packages, with services and add-ons that integrate with WHM/cPanel, Plesk, and even the Liquid Web API
- Automatically handle tasks from provisioning accounts and management to billing and email
- Differentiate yourself by creating unique products that fit any customer budget using our private cloud and open source WHMCS plugin. (Our plugin is completely free to use and customize – see for yourself!)

Storm® Products

Storm® Servers are the next generation of hosting, providing the power of dedicated server hosting with the flexibility of cloud hosting. Available with Linux or Windows, our Storm® Platform is engineered to help your customers do more and your revenue grow faster.

Check out what our range of Storm® Servers can offer you and your customers.

Product	Storm Private Cloud	Storm VPS	Storm Dedicated	Dedicated Servers
Why you want it:	Give your customers – or yourself – the ultimate power in customization. Storm® Private Cloud is infinitely scalable, with more security than a public cloud and more reasons for customers to choose you over the competition.	Storm® VPS enables you to create a VPS with cpanel and sell shared hosting with cloud-like flexibility or sell the entire VPS at a higher price point. For your customers, it means power and customization. And for you, it means money in the bank.	Storm® Dedicated is what resellers might call the complete package. This reliable, secure hosting option gives you the benefits of a dedicated server but with cloud-like features. That means peace of mind for your customers and a revenue-generating monster for you.	Need customizable hardware? Have customers who need to meet specific security standards, like HIPAA or other compliance requirements? Traditional dedicated servers are for you!
Why Liquid Web beats the competition:	Storm® Private Cloud is easy to configure with Windows, Linux or even a mixture of both – your customer's wish is your command. Our team is here to help ensure the magic endures with our guarantee to respond to your every support need in under a minute.	Storm® VPS hosting is proven to be up to 200% faster than Rackspace, Amazon, and Digital Ocean. But our hosting isn't the only thing speeding past the competition; Storm® VPS comes with 24/7/365 support with a guaranteed response time of less one minute.	Let us count the ways: 1) Free, open-source WHMCS plugin. 2) Decades of experience helping resellers configure competitive cloud packages to earn more on every sale. 3) A secure, stable product you'll be proud to put your name on. 4) The friendliest humans in hosting at your side 24/7/365.	Resell the latest server technology, not outdated hardware like our competitors'. You think our dedicated servers are impressive? Wait until you meet our dedicated team, offering fully managed support and a 30-minute hardware replacement SLA.
